Bartlett Hall—Institution for the Deaf and the Blind.

REPORT OF THE BOARD OF DIRECTORS.

To His Excellency HIRAM W. JOHNSON,
Governor of the State of California.

SIR: The Board of Directors of the California Institution for the Deaf and the Blind hereby respectfully submit their report for the two years ending June 30, 1912, including the report of the principal and treasurer. We refer you to the report of the principal and treasurer for a full and complete statement of the receipts and expenditures, the general conditions of the institution, the number of pupils and many other matters showing the present conditions of the institution, and the many changes which should be made and approved by the state administration in order to have this institution conducted for the best interests and welfare of all the children committed to the care of this institution.

The present Board of Directors consists of Geo. W. Reed of Oakland, president; Walter J. Mathews of Oakland, vice-president; W. E. Creed of Berkeley, J. Arthur Elston of Berkeley, and Prof. David P. Barrows of Berkeley.

Mr. Thomas Rickard, who was a member of this Board, died on the twenty-fifth day of March, 1911, and J. Arthur Elston was appointed by you to fill his position. Melvin C. Chapman resigned as a member of this Board, and Prof. David P. Barrows was appointed by you to fill his position. These two gentlemen, who were appointed by you, have devoted their time and close attention to the affairs of this institution, and have been of very valuable assistance in all matters which have come before this Board.

Shortly after the report from your honor upon the investigation which was conducted by you in the month of July, 1911, Mr. Douglas Keith resigned as principal, and to give this Board sufficient time to select the proper man, Mr. W. A. Caldwell was appointed as principal temporarily at the pleasure of this Board, and held this position until August 1, 1912.

This board devoted a great deal of time in deciding whom to select as principal. We communicated with nearly all the large institutions of this kind in the United States, and got all the information possible from the many institutions and forwarded to your honor a copy of these communications which you now have in your records. We finally decided to appoint Mr. L. E. Milligan, who had been president of the State Schools for Deaf, Blind and Backward Children at Boulder, Montana, for a number of years, as the principal of this institution,

commencing August 1, 1912. Before making this appointment we sent Professor Barrows, one of the directors, to the institution conducted by Mr. Milligan at Boulder, Montana, and upon his return Professor Barrows reported that Mr. Milligan was the proper man to appoint, and we immediately passed a resolution appointing Mr. L. E. Milligan as principal to take office August 1, 1912. We invited Mr. Milligan to come out to the institution and look over the buildings and grounds and know the existing conditions before taking his position, so that he would be perfectly satisfied to take charge of this institution. Mr. Milligan came out at our request and was perfectly satisfied to accept this position, and took his position August 1, 1912. This Board desires to express to Mr. Milligan our great appreciation for the manner in which he is conducting this institution, and we sincerely believe that he will make this institution one of the best in the United States for the benefit of the poor and unfortunate children.

This board approves the report of Mr. Milligan in regard to changing the laws of this State governing this institution, and the judiciary committee has taken this matter up, and will introduce at the next meeting of the legislature the new laws which we believe will meet their approval and will be passed for the benefit of this institution.

We desire to call your attention to the report of Mr. Milligan in regard to the appropriations which he considers necessary for properly conducting and managing the affairs of this institution, and we hope that all these matters will be carefully considered and looked into by the state administration, and that such appropriations may be made by the State if possible.

On the nineteenth day of April, 1912, a fire occurred at the hospital, and this Board examined this matter and sent a report of the same to your honor. It was absolutely necessary that this hospital be put back in proper shape at once for the benefit of the pupils. In order to remodel this building, we received permission from the Board of Control to expend the money necessary for this purpose out of the Durham fund with the understanding that the next session of the legislature would make an appropriation for the amount so expended to be returned to said fund. The amount so used was $3,372.88, and we therefore ask that this amount be appropriated by the State and returned to the Durham fund, which is one of the private funds of this institution.

When the investigation above referred to was conducted, your honor employed a stenographer to take down the testimony and make a transcript of the entire proceedings. The Board of Control instructed this Board to pay from the support and private funds of this institution the bill of the stenographer, amounting to the sum of $2,236.20, which was done, with the understanding that this amount would be refunded to our support fund at the next session of the legislature. We therefore request the Board of Control to see that this is done, for we need this money in order to have sufficient money in our support fund to properly conduct this institution.

The Board has carefully and conscientiously performed all its duties and devoted much time to see that the affairs of this institution are properly conducted, and now, with the assistance of the State of California, in carrying out the ideas of our new principal and other recommendations of this Board, we are satisfied that this institution will be one of the most important in this State for the benefit of its poor and unfortunate children, which we trust will meet with the approval of your Excellency and the people of the State of California.

Respectfully submitted.

GEO. W. REED,
President Board of Directors.

Berkeley, December 16, 1912.

"A Montessori Pupil."

Report of the Principal

OF THE

California Institution for the Deaf and the Blind

To the Board of Directors

For the Twenty-four Months ending June 30, 1912

REPORT OF THE PRINCIPAL.

To the Directors of the California Institution for the Deaf and the Blind.

GENTLEMEN: Herewith is submitted the biennial report for the period ending June 30, 1912, together with statement of receipts and expenditures for the same period, and estimates of appropriations needed for the support of the institution for the two years ending June 30, 1915. As the present principal took charge August 1, 1912, the report is necessarily made from records found in the office. The recommendations are the result of a careful study of the present condition and needs of the institution.

ATTENDANCE.

Enrolled June 30, 1910, to June 30, 1912:		
Deaf department	197	
Blind department	96	
Total under instruction		293
Graduated or left school:		
Deaf department	54	
Blind department	25	79
		214
New admissions since opening of school August, 1912:		
Deaf department	31	
Blind department	11	42
Present enrollment December, 1912		256

Waiting List.—Since June 30, 1912, we have received sixty-two applications, for admission, which we have been unable to grant for lack of room. There are probably two hundred deaf and blind children of school age in the State who are entitled to admission to the state institution.

HEALTH.

The sick have been well cared for under the direction of Dr. M. L. Emerson, who visits the institution once a day and oftener if necessary. The hospital is in charge of a trained nurse and an assistant. Dr. Musser, of Oakland, has examined all the pupils for eye, ear, nose and throat troubles and has performed a number of operations for the removal of adenoids and enlarged tonsils. Dr. Halsey, our dentist, has examined the children's teeth and placed them in a sanitary condition. For further details I would refer you to the reports of the medical officers.

ADMINISTRATION.

Change of Laws.—Many of the laws governing the institution have been rendered inoperative by the passage of the board of control act by the last legislature. Some of the provisions still in force, while admirable at the time of their passage in 1872, do not satisfy the present conditions. I would recommend that the laws relating to the institution be revised by the judiciary committee of your Board, and that a bill incorporating the desirable features of the laws governing similar institutions in the east be introduced at the next legislature.

Centralizing Responsibility.—Some improvements in the administration of the institution should be made as soon as money can be found to carry them into effect. Each of the five dormitories has a matron in charge who is an independent officer and looks only to the principal for orders. Also the cook, baker, laundryman, and boys' supervisor depend for their directions on what attention the principal or the clerk is able to give them. It would promote efficiency and economy to have a head matron or housekeeper who would co-ordinate the work of the above-mentioned officers and employees and have general supervision over the whole domestic department.

A similar situation exists in regard to the regular employees about the grounds. The dairyman, gardener, florist, engineer, yardman, and teamster are frequently working at cross purposes. A foreman of the grounds who had general oversight of all these employees could harmonize their differences and save his salary to the State several times over.

Pensions.—A pension system similar to that employed in the army seems to be greatly needed. We have a number of teachers and employees who have served the State long and faithfully on salaries that would not permit them to save for their old age. Instead of heartlessly kicking these teachers out they should be automatically retired on a pension when they reach a certain age.

SCHOOL FOR THE DEAF.

Methods.—It has been the experience of the fair-minded members of the profession that about twenty-five per cent of the pupils in the state schools can learn to speak and read the lips very well. Another twenty-five per cent can learn to speak and read the lips well enough to be able to communicate with their teachers, relatives, and intimate friends. An additional twenty-five per cent can get some benefit from the oral method of instruction, but not enough to make it worth while to devote any great amount of time to it at the expense of their general education. The final twenty-five per cent, through some physical defect, like poor eyesight, or perhaps some mental sluggishness, are unable to make any progress by means of the oral method. Written English, manual spelling and signs should be used in the education of such cases.

The parents of the pupils are almost unanimous in demanding that

Durham Hall—Institution for the Deaf and the Blind.

their children be educated by the oral method. We aim to give each child every opportunity to learn to speak and read the lips. However, if this is impossible we are not in favor of sacrificing the mental development of the child on the altar of the pure oral method. As is being done in progressive schools everywhere, the method of instruction should be fitted to the child and not the child to the method.

Changes.—Miss Christy, an experienced teacher from the Minnesota school, has been added to the faculty of the deaf department since the last biennial report. The classes, both manual and oral, are too large for the most efficient work. The classes average twelve pupils. With the amount of individual instruction necessary a teacher cannot handle to the best advantage more than ten pupils.

SCHOOL FOR THE BLIND.

Course of Study.—The course of study has been revised so many times in the last few years that no one could tell me exactly what or where it was. Some of the teachers made no pretense of following anything but their own idea of what was right. We are at work on a course of study along the following lines, which we hope to have ready early in the winter. The first six grades correspond closely to the work of the public schools of the State. Here the course becomes elective, offering a series of studies to those desiring to enter the State University and an industrial and commercial course for those who desire to take up some trade suited to the blind, or go into business. An excellent musical course under the direction of Prof. Otto Fleissner is offered in conjunction with the other branches. Some form of manual training will be required in all grades as soon as the legislature provides the money to install it.

Changes.—Mr. Richard S. French, head of the blind department, resigned last December and was succeeded by Dr. Newel F. Perry, a graduate of this school, the State University and of Munich.

INDUSTRIAL DEPARTMENT.

Trades Taught.—Since the destruction of the old Industrial Building by fire two years ago the industrial work has been greatly hampered. Sixty deaf boys have received instruction in carpentry under Mr. Jensen. Miss Faville has taught cooking and basketry to the girls, and Miss Dillon has had the boys in sloyd and reed and raffia work. Mrs. Brown has classes in laundry work for the older girls. The matrons have classes in sewing and dressmaking in the girls' dormitories. A small printing office has been fitted up in the old laundry in charge of one of the older pupils.

New Industrial Building.—The new Industrial Building for which the last legislature made an appropriation of $60,000 is approaching brick. The contract price, was, including plumbing and heating, completion. It is a three-story building, 50 by 100 feet, of cement and $29,999. The state architect has been paid for the plans and super-

vision out of the appropriation. Extra contracts will have to be let for sewerage connection and partitions. This leaves for the equipment of the shops approximately $20,000. We plan up-to-date printing and carpentry shops, shoe and harness making, barbering, drafting and a physical and psychological laboratory. The blind will be taught piano tuning, chair caning, basket making, sloyd, hammock and rug weaving, broom making and masseuring, if the legislature provides the money to employ the necessary teachers.

REPAIRS AND IMPROVEMENTS.

The last legislature appropriated $4,000 to improve the water supply and plumbing. This amount will be spent under the direction of the State Engineer. Arrangements have been made to let a contract for the work December 20, 1912. Four hundred and seventy-five dollars was also appropriated to pay for one-third of the work of paving Derby street, which bounds the institution property on the south.

APPROPRIATIONS.

In reviewing the estimates for support and special appropriations we beg you to consider the excellent record this institution has made for economy. In the past forty-six years there has never been a deficiency and all estimates have been pared to the quick. The following estimates are recommended by the State Board of Control and the State Controller and are included in their budget as most urgent and necessary.

The items are placed in the order of their importance.

	1910-12.	1913-15.
a. Support	$50,000 00	$60,000 00

An increase of $5,000 for each of the following two years:

1. To meet the increased cost of living.
2. To improve the food supply.
3. To admit more children from the waiting list. We have had sixty-two applications since June 30, 1912, that we have not been able to admit.

	1910-12	1913-15.
b. Salaries and wages	$105,000 00	$130,000 00

An increase of $12,500 for each of the following two years:

1. To provide teachers of trades.
2. To transfer salaries from contingent fund to state appropriation. The contingent fund will be nearly wiped out during the next two years, owing to the establishment of deaf and blind schools in Arizona and Nevada.
3. To transfer salaries of medical staff from special bequests to state to avoid legal complications. Our special bequests were donated to help deserving poor pupils after they had left school.
4. To provide additional teacher in deaf department and one in blind department.
5. To provide for head matron.

Refectory—Institution for the Deaf and the Blind.

Present salary appropriation		$165,000 00

Increases asked for per month—

Present pay roll account, contingent fund	$150 00	
Present pay roll account, Durham fund	275 00	
Teacher of cobbling	75 00	
Teacher of printing	90 00	
Teacher of piano tuning	51 66⅔	
Teacher of agriculture	50 00	
Teacher of barbering	50 00	
Teacher of Carpet and rug weaving, hammock making, chair caning, basket making	50 00	
Teacher of athletics and supervisor	50 00	
Teacher of deaf	75 00	
Teacher of blind	75 00	
Head matron	50 00	
Total increase for one month	$1,041.66⅔	
Total increase for one year		$12,500 00
Total increase for two years		25,000 00

I. *Gymnasium.*

Building	$50,000 00	
Equipment	2,500 00	
		$52,500 00

1. The revised plans of the state architect call for a $50,000 building. The essential items of equipment can be bought for $2,500.

2. The physical development of the children is not provided for at present.

3. It is impossible to give the pupils regular and systematic exercise out of doors from November to June on account of the rain.

4. Regular exercises under careful supervision is a necessity with deaf and blind children to prevent and correct evil habits. It was brought out at the recent investigation that several blind pupils had gone insane from that cause.

5. There is no place provided at present for social gatherings.

6. The swimming pool would provide water for irrigation.

II. *School equipment.*

Our school equipment is largely worn out and out of date.

1. Braille stereographer, press, map-maker, brass plates, binding outfit and motor	$1,600 00	
2. Braille slates and writers	260 00	
3. Raised and plain maps, globes and text-books	790 00	
4. New upright pianos, rebuilding of chapel organ	1,800 00	
5. Typewriters, 6 Remingtons and 6 Underwoods at $50	600 00	
6. Violins, 'cello, clarionets, and music	350 00	
7. Books in raised print	1,200 00	
8. Books in ink print	800 00	
9. Kindergarten material	100 00	
		$7,500 00

III. *Repairs and improvements.*

1. The dormitory floors are worn and splintered	$1,050 00	
2. Cement stairways are badly worn and should have new treads	350 00	
3. All the cornices and windows need paint	1,500 00	
4. The fence around the school property must be replaced	1,600 00	
		4,500 00

IV. *New machinery.*		
1. The kitchen machinery is old and worn out	$3,175 00	
2. The laundry machinery is also out of date and too small	3,500 00	
3. There is no ice on the place. We cannot keep meat or perishable articles except for our immediate needs.		
Cold storage plant	4,000 00	
4. Much of the wiring is dangerous, new sewer and plumbing connections are needed	500 00	
		$11,175 00
V. *Dairy barn.*		
1. The dairy barn is unsanitary.		
2. It is too small.		
3. The neighbors threaten to compel its removal as a public nuisance.		
Building	4,000 00	
Excavation and grading	500 00	
Steel equipment	1,500 00	
		$6,000 00
VI. *Fire escapes.*		
1. The old towers on the five dormitories have been condemned as dangerous by the Berkeley fire chief and the state architect.		
2. Kirker Bender escapes are the only satisfactory fire escapes for an institution where more or less helpless children are cared for.		
3. We have placed the fire escapes last in importance as fire is only a possibility, while our other needs are actual conditions that we have to live with and provide for.		
Estimate of Dow Wire and Iron Works for five fire escapes	$6,020 00	
Cost of installing same	480 00	$6,500 00
		$88,175 00

SUMMARY.

a. Support	$60,000 00	
b. Salaries and wages	130,000 00	
		$190,000 00

SPECIAL APPROPRIATIONS.

1. Gymnasium and equipment	$52,500 00	
2. School equipment	7,500 00	
3. Repairs and improvements	4,500 00	
4. New machinery, etc.	11,175 00	
5. Dairy barn	6,000 00	
6. Fire escapes	6,500 00	$88,175 00
		$278,175 00

ACKNOWLEDGMENTS.

To the many friends who have contributed to the pleasure and profit of the pupils we are profoundly grateful.

Personally, I desire to express my deep appreciation of the warm welcome and assistance I have received from the Board of Directors and all interested in the institution. While it will doubtless be impossible to live up to the expectations of all I assure you that my best judgment and energy will be devoted to the welfare of the children committed to my care.

Respectfully submitted.

L. E. MILLIGAN,
Principal.

Berkeley, California, December 16, 1912.

Manual Arts Building.

PHYSICIAN'S REPORT.

To the Board of Directors of the California Institution for the Deaf and Blind.

GENTLEMEN: During the past two years there has been a total of four hundred eighty-three cases in the hospital, an average of twenty-three cases per month. They remained from two to seven days; the average case six days.

There has been a monthly average of two hundred forty-seven treatments and eighty-eight surgical dressings and minor operations at the hospital clinic.

A physical examination has been made of every pupil; a card system of records is kept; every case is vaccinated, nose and throat cultures taken, tonsils and adenoids removed; also circumcision, when necessary.

Diphtheria carriers as well as any infectious cases are immediately isolated.

During the vacation period the entire institution, comprising seven large buildings, has been thoroughly fumigated from attic to basement and all plumbing and drains inspected.

The sickness has been mostly colds, bronchitis, influenza, abdominal disorders and infectious diseases. The latter are immediately isolated in single rooms in the hospital.

The more serious cases were:

Fracture	5
Diphtheria	5
Pneumonia (severe type)	8
Mumps	5
Measles	23
Appendicitis	1
Meningitis	1

There were three deaths. One, a fracture of the skull due to a fall from the second story of a dormitory, which occurred at night. This boy had frequent attacks of heart syncope and went to the window for relief. He had been in good health for several weeks preceding the fall. The second was from tuberculous pneumonia; the third was lobar pneumonia in a delicate child, following measles.

On April 19, 1912, the roof of the hospital was burned (cause unknown). This necessitated our occupying another building for two months. The attending physician has been in daily attendance; a graduate nurse always in charge. The hospital is well elevated and separated from the other buildings, a thoroughly sanitary and up-to-date institution.

Our object has been to get all sick cases in their incipiency, not only

of the school children, but the entire help of the institution. The co-operation of the superintendent and his assistants has helped us greatly in this respect, and we feel that we have aborted many cases of more serious sickness by this method.

The position of the attending physician has been made unusually pleasant by the cheerful co-operation of the superintendent and his assistants; also the board of directors, who seem to be more than willing to do what is necessary for the physical welfare of the institution.

We are indebted to the Merritt Hospital for the handling of the more serious surgical cases. Also the State Hygienic Laboratory, conducted by Dr. Sawyer and his assistant, Miss Fay, for the preparing and examining of over one thousand cultures and blood specimens from this institution.

There has been a notable decrease in infectious diseases, which we feel has resulted from our heroic effort along hygienic lines.

Respectfully submitted.

MARK L. EMERSON,
Physician and Surgeon.

December 26, 1912.

OCULIST'S REPORT.

To the Board of Directors of the California Institution for the Deaf and the Blind.

GENTLEMEN: The majority of cases referred to me by the visiting physician have been mostly of a chronic nature, comprising various forms of eye trouble and chronic ear disease. The majority of these have been cleared up. A half day a week is given to the hospital in diagnosing and treating cases. Twenty-six cases of tonsilitis and adenoids have been operated upon. A thorough enucleation of the diseased tonsils was done in each case, which required a general anæsthetic. Midweek treatments have been done mostly at my office, the operations being done at the Merritt Hospital.

The indifference of the parents has been a great drawback in nose and throat work, as it is necessary to get their consent to operations. These, however, have been overcome and we expect less trouble from this source.

A thorough examination of all the pupils in the school show that about thirty-five cases still require their tonsils and adenoids removed, which we expect to do this year.

Respectfully submitted.

FRANCIS R. MUSSER,
Oculist and Aurist.

December 24, 1912.

DENTAL REPORT.

To the Board of Directors of the California Institution for the Deaf and the Blind.

GENTLEMEN: During the last two years the teeth of all the pupils have been examined and treated. With the exception of a few acute cases, which are still under treatment, the teeth of the children are in a healthy and satisfactory condition. The following is a list of the work done from June 30, 1910, to June 30, 1912:

Number of patients treated	125
Number of teeth extracted	195
Cleanings	168
Abscesses treated	86
Exposed pulps treated	75
Wisdom teeth treated	18
Dressings and treatments	318
Temporary fillings	40
Cement fillings	110
Amalgum fillings	229
Root canal fillings	52

Respectfully submitted.

W. H. HALSEY,
Dentist.

September 28, 1912.

TREASURER'S STATEMENT.

For the Twenty-four Months Ending June 30, 1912.

STATE APPROPRIATION.

Received from state treasurer	$147,340 06	
Special appropriation	475 00	
DISBURSEMENTS.

Name.	Home.	Cause of Blindness.
Campomenosi, Edna	San Francisco	Congenital
Perkins, May	Modesto	Albino
Wooster, Virginia	Oakland	Ophthalmia

TERMS OF ADMISSION.

The California Institution for the Deaf and the Blind is located at Berkeley, about four miles north of the city of Oakland. Between San Francisco and Berkeley, railroads and ferries offer communication every ten minutes of the day, and from Oakland there are two lines of electric cars which land passengers within five minutes' walking distance of the institution.

The institution offers its benefits to all deaf or blind persons who are of age suitable for instruction, who are of sound intellect, and free from vicious habits and contagious or offensive diseases. No charge is made for pupils from this state, except for clothing and traveling expenses. Pupils from other states or territories are charged $340 per annum, payable quarterly in advance. No reduction is made from annual charge, except in case of prolonged absence by reason of sickness.

The session begins on the fourth Wednesday in August and ends on the second Wednesday in June. Parents are earnestly requested to enter or return their children promptly at the beginning of the term. Only in extreme cases will pupils be permitted to leave before school closes.

Pupils should be provided with comfortable clothing when they enter the institution, and their wardrobe renewed twice a year.

All moneys designed for pupils should be placed in the hands of the principal, to whom, also, all letters of inquiry should be addressed. Money orders should be drawn on the Berkeley post office, and all letters, packages, trunks, etc., should be addressed "Institution for the Deaf and the Blind," Berkeley, California.

Parents or guardians of applicants for admission are requested to furnish answers to the following questions:

1. What is the name of the applicant?
2. When and where was he born?
3. Is his deafness or blindness from birth, or is it from accident or disease? If from accident or disease, at what age and from what cause did he become deaf or blind?
4. Is his deafness or blindness total or partial? If the latter, what is his degree of hearing or sight?
5. Have any attempts been made to remove his deafness or blindness? If so, what were the results?
6. Are there any other cases of deafness, blindness, idiocy, or insanity in the family, or among the collateral branches of kindred? If so, state the relationship.
7. Was there any blood relationship between parents or grandparents?
8. Has the child had smallpox, scarlet fever, mumps, whooping cough, or measles? Has it been vaccinated?
9. What are the names, nationality, and post office address of parents?
10. What is the number of other children?
11. How long have parents lived in California?

Address all communications to the principal.

L. E. MILLIGAN,
Institution for the Deaf and Blind,
Berkeley, California.
